Introduction

This manual is intended for new users that are going to use the application to do the following:

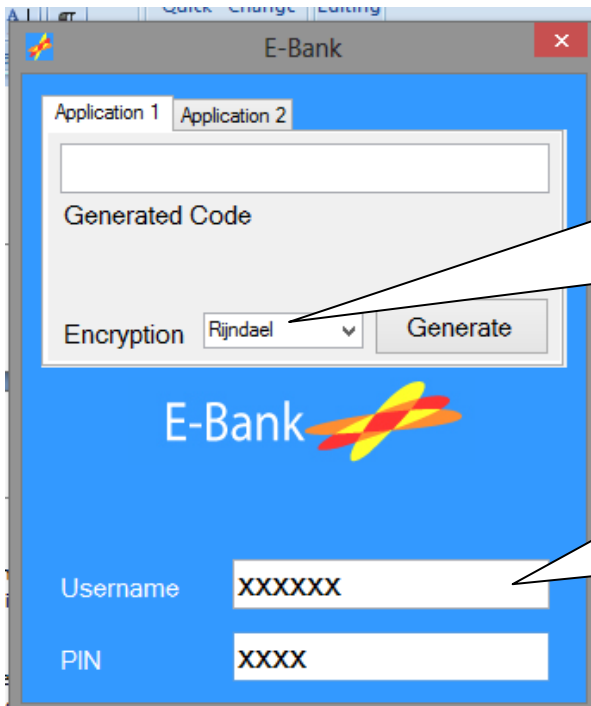

- To Create Accounts.
 - Savings
 - Currents
 - Visas
 - Fixed - 1 month, 3 months, 6 months and 12 months
- Transfer between own accounts
- Pay third party people
- Request Appointment
- Print Statement
- View Logs
- View Appointments

Desktop Application

The application is available is to be used only with the system. The application generates encrypted code and decipher code need to access the application and verify transactions. The application is split into 2 sections:

- Application 1 will generate 8 character code used to log in the system.
- Application 2 is used when the website needs verification.

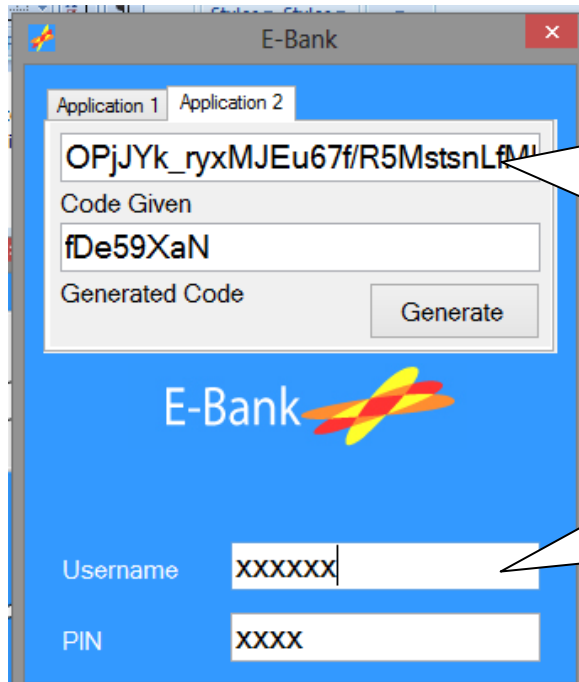

Using Application 1

The user can change his encryption type, it is recommend to use Rijndael.
Other types: Rijndael, 3DES, DES, RC2
Click on Generate to generate the 8 character string

Fill the form with your username, and with your PIN. The pin will never be checked so the PIN needs to accurate or the authentication will fail.

Using Application 2

When the user is prompted with a verification the user can decipher the code and verify if the username and pin are valid

Fill the form with your username, and with your PIN. The pin will never be checked so the PIN needs to accurate or the authentication will fail.

The user will have a summary of his bank profile in this page.

Accounts Page

The screenshot shows a web browser window with the URL `http://localhost:59110/Profile/Accounts`. The page title is "Accounts | Matthew Buhagiar" with the email `buhagiarmatthew@gmail.com`. Navigation links include Profile, Accounts, Convert, Appointments, View Logs, View Appointments, and Logout. A date/time indicator shows "Date: May 2013 Time: 19:00".

Below the navigation, there are links for "Create a new Account", "Transfer", and "Pay Third Party". A table titled "Accounts" lists several accounts with columns for Account Id, Name, Available, and Currency. The accounts are color-coded: green for fixed accounts, orange for closed accounts, and yellow for normal accounts.

Account Id	Name	Available	Currency
740ac85f-1957-4da5-b2e7-451befcd56be	Visa	5940.80	USD
7de5ea02-c474-4b12-9b83-83c03580377b	Test Fixed 1	780.20	EUR
73fb4676-1fb1-411d-800e-995fb9117005	Test Not Fixed	1989.14	EUR
78f475eb-44a0-4841-9ec2-a5339b6d4fd5	Fixed 6 Test	1026.20	AUD
897f90cb-90e0-433d-8462-df718396f98d	Fixed Account 2	779.60	GPD

Below the accounts table is a "From:" and "To:" form with a "Submit" button. A second table titled "Transactions" is visible, with a callout box pointing to its header: "A small function is to filter transactions".

The section contains the users account.
Green are fixed, Orange are closed account and the rest are normal account

A small function is to filter transactions

Account Details

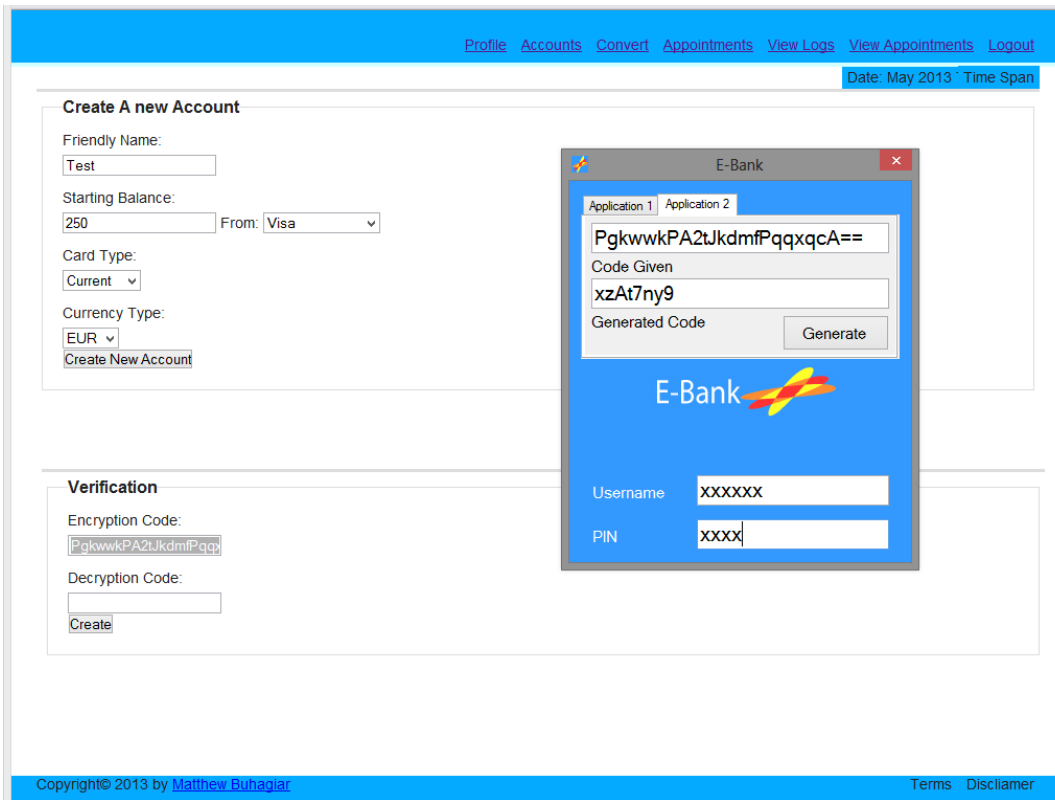

In this page the user can view in more detail about the account, the user has an option to print the details on the top right of the page.

The screenshot shows the "Account Details" page for the "Visa" account. It includes fields for Name, Account Type, Available, Balance, Currency, Date Create, Closed, and Locked. There is a "Print Current Account" link on the top right. Below the account details is a "From:" and "To:" form with a "Submit" button. A table titled "Transactions" lists transactions with columns for Form, To, Amount, Date, and Description. A callout box points to the table header: "A small function is to filter transactions".

Print function

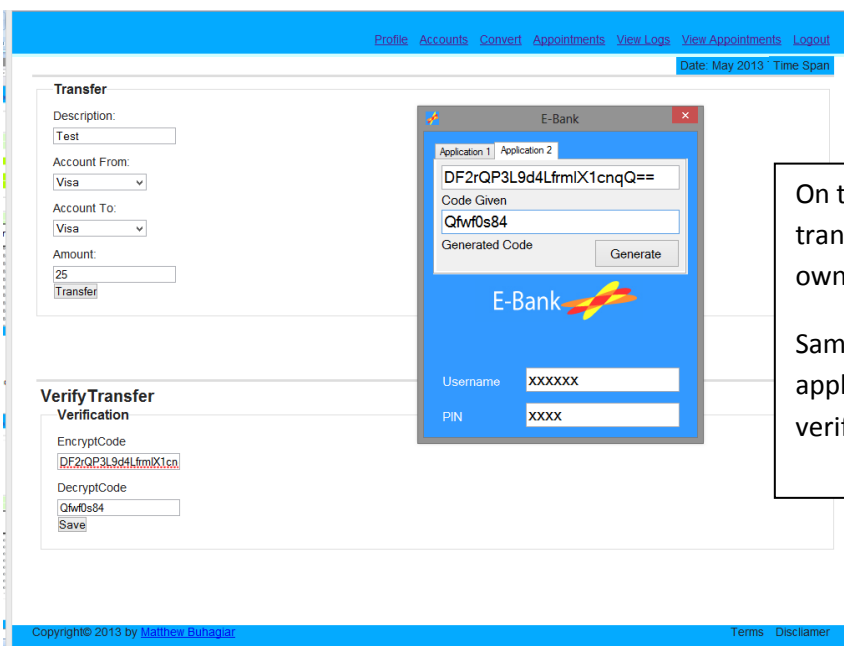

A small function is to filter transactions

Create Account Page

The user adds the account details and when the create account is clicked the verification account will pop up and the user should enter the code decipher in the application. The account will be added in the application.

Transfer to own Account

On this page the user can transfer amount between his own account.
Same as before the application is decipher to verify the transfer.

Pay third party users

Same as transfer page , the only difference is that the user need to enter the other account's id. If the account id is valid but the not in server, the user need to confirm

Currency Convert Page

The page will get the latest rate and convert amount the user inputs in the system. Transaction uses the same service to convert the amount

The user needs to enter the date and any comment he or she desires. New Appointment will be viewed on next login

When an appointment is approved or rejected an email will be sent to the user's registered email. With the email an appointment file will be available.

Conclusion

The application is relatively easy to use and everything is explained. All functions are explained in this user manual.

The site can only be used with the desktop application, transfer, create account ... will not process without verification.

For your best experience JavaScript should be enabled and some functions will not work if JavaScript is disabled.
